WHY MALAYSIA?

> HIGH QUALITY

Malaysia is well-known throughout the world for its production of high quality natural rubber latex, derived from the sap of the hevea brasiliensis tree, which is widely grown in Malaysia. This high quality latex is used by Malaysian condom manufacturers to produce premium quality condoms. These condoms are wrapped in foil packaging and sealed using advanced equipment to protect them from deterioration as well as to preserve their reliability, even under the most adverse storage conditions.

> EFFECTIVE

Made-in-Malaysia natural rubber condoms are highly effective against most sexually transmitted diseases, including the HIV virus. Various studies have shown that natural rubber condoms with better tensile strength and greater ultimate elongation are more resistant to breakage than condoms made from other materials.

> ENVIRONMENT FRIENDLY

Natural rubber is an inherently environment-friendly material and rubber trees contribute to environmental protection. Condoms made from Malaysian natural rubber are biodegradable.

> INTERNATIONAL STANDARDS

Malaysian made condom are manufactured and tested to meet the requirement of stringent international standards such as ISO 4074:2002, ASTM D 3492:2003 and BS EN ISO 4074:2005.
