

Malaysian Rubber Export Promotion Council

# MALAYSIA: HOME OF QUALITY RUBBER PRODUCTS

# The Advantages of Malaysian Rubber Household Products

## Good Quality

Malaysia is an established producer of high quality natural rubber latex, derived from the *Hevea brasiliensis* tree, which is widely grown in the country. This high quality rubber is used to produce quality rubber household products which are tested with modern equipment before they reach the consumers.

## International Standards

Malaysian-made rubber household products are manufactured to meet international standards such as ISO, ASTM and ENT.

## Research and Development Support

Continuous efforts and support in research and development by the Rubber Technology Centre of the Malaysian Rubber Board (MRB) in Malaysia and the Tun Abdul Razak Research Centre (TARCC) in the United Kingdom has enabled Malaysian rubber household product manufacturers to continuously produce high quality household products.

## Environment-friendly

Malaysian-made household products that are produced from natural rubber are a better option from PVC products that are hazardous to our health and environment.

## Product Variety

Malaysian manufacturers produce a wide range of rubber household products such as rubber hoses, sink mats, rubber sink plungers, door stoppers, door wedges, rubber bands, rubber toys and baby products.

Mattress

Household Glove

Floor Mat

Toys

Hot Water Bottle
